

TITLE IX ATHLETICS SELF-EVALUATION CLASSES

What Your Colleagues Said About The Title IX Classes (in-person pre-covid):

"In 20 years in athletics, your class was the best professional experience of the seminar/workshop program that I have ever attended. Thank you so much for a great week. Your presentation and insight was fantastic. Clearly, I have lots to learn but feel as if I gained a tremendous amount of knowledge and a bit of 'know how' from our class."

Donna C. Thomas, Former Senior Associate Athletics Director
University of Tennessee

"The class was terrific. The fact that we brought our own data and our own programs / facilities / ways of operating with us to analyze made the class exceptionally valuable. You kept it light, humorous, but thorough and detailed. I appreciated the fact that you did not present 'one' way of doing or looking at things, but that the interpretations are actually multi-faceted and multi-layered and there are many ways to achieve the end objectives. Thank you for taking us through the legislation and interpretations in such an orderly and detailed manner."

Mark Adzgian, Associate Director of Development for Athletics
Tufts University

"Val, I feel very fortunate to have crossed paths with you, as you are brilliant and informative. Your class was so informative and necessary for anyone dealing with collegiate athletics today. Thanks for the opportunity to have the proper knowledge in order to better serve our students and our institution."

Denise McIntire, Former Athletics Business Manager
Salem International University

"Thank you! The class was outstanding and educational to say the least. I know I will be a better administrator with what I learned."

Chuck Sack, Director of Athletics and Recreation
Neumann University

"Class was awesome. Thanks for taking the time to share your valuable knowledge with us. You do a tremendous job with your presentation and explanations. You are such a valuable resource for Athletic Administrators. Appreciate all you do."

Cliff Wurst, Faculty, Kinesiology
